Fonda, New York 12068*

February 2, 2012

Dear Chief,

Montgomery County will be hosting a **Respiratory Protection Training Program** class on Tuesday, February 14th and Wednesday, February 15th at EOC.

This class is designed for a fire department's respiratory protection program as defined by 29CFR 1910.134, the OSHA Respiratory Protection Standard. Curriculum content outlines the requirements of the program's standards for emergency escape devices, air purifying respirators (negative pressure), and self-contained breathing apparatus (positive pressure). In addition, the training is provided on the procedures and equipment to conduct a quantitative fit test.

Department's that administer their own fit tests on an annual basis and who use County-owned fit testing equipment are **STRONGLY RECOMMENDED** to send representatives or interested personnel for this training.

Also, there are **NO prerequisites** for this class

Please contact EOC at 853-4011 or sign up via the County Fire Service webpage.

Sincerely,

Dwight A. Schwabrow, County Fire Coordinator
Montgomery County Office of Emergency Management
