Detailed Description

The HP-5010, K9 HOT-N-POP® Pro, is a combination K9 HEAT ALARM® Pro and K9 Door Popper® system. The unit monitors vital components including temperature sensors and vehicle battery voltage.. The information is shown on a 32-character backlit alphanumeric display. If an alarm condition is detected, the unit will activate a S.O.S. Horn Honk signal, siren and light-bar activation, and dual window drop. The K9 Door Popper releases your K-9 partner from the vehicle to be by your side in an emergency situation. A special Door Pop Stopper feature disables the K9 Door Popper when the vehicle is in gear. The systems come complete with long range digital transceiver with nylon case, external antenna, wiring, and assorted hardware. Software based features allow for future upgrades.

Note on Pager System: If ordering a remote pager system for a HOT-N-POP® , please select the [Dual Band Antenna Option](#).

- **HOT-N-POP® PRO Part # HP-5010-X Includes:**
- S.O.S Horn Honk™ Feature- "makes the vehicle horn sound like no other".
- "Forget Me Not" AUTO ON Feature View More Details About This Feature
