January 6, 2002

To: Montgomery County Planning Board

This letter is to convey my immense disapproval of a proposed wind turbine on Reynolds Rd in Glen, NY.

We own second generation family land within 3 miles of this site. Our lives and our children's lives will be affected by this project. We have many questions and concerns about the approval process. For example, how can one land owner make a selfish decision that affects the surrounding community and we have no say in this? How does a Solar company like Barrogo get to propose a massive wind turbine (first for their company) in our farm land community? Why am I paying for this with my tax dollars? Why would such a large project get such a massive 15 year tax break when our property values will be greatly affected? I can not believe this project is even being considered! Anyone can make promises to sell their ideas, how do you know this will not have a long term negative effect on our community? The burden you are asking us to take on is too great, Please listen to our pleas.

Some things in life are worth far more than money, I hope you consider your community's needs with this project.

Sincerely,

Joyel Cuts
