Re: Town of Glen Community Wind Project

Dear Planning Board Members,

On behalf of Borrego and the project team, we appreciate the time and effort you have all spent reviewing the details of this project. This project will yield multiple benefits to the community, most importantly cleaner energy and lower electricity bills to residents. We expect this project to offer a similar discounted electricity rate of 10% as compared to other similar sized community wind projects in New York. To further provide economic benefits to the community, Borrego would like to offer the Town a "Community Host Agreement." This gives the Town a unique opportunity to utilize the funds from the Community Host Agreement to address community-specific needs over and above any tax obligations that this project has.

We hope this demonstrates our commitment to the community, the robust benefits of our project, and that the proposed project is properly sited, and will be safely installed and operated, fully protecting the Town of Glen and local stakeholders.

We continue to urge local stakeholders to sign up for project updates and request information using the 'Contact Us' link in the landing page, which can be found using this URL: "borrego.energy/Glen". I will personally receive all questions and concerns and will do my best to respond expeditiously.

Sincerely,

David Strong
