

2/3/22

Town of Glen Planning Board

I do not live in your township but I do live in Montgomery County.

Local Law regulating Solar Panel installations.

Does it address what happens when no longer used?

Is the developer responsible for the removal of panel?

Is the developer responsible to restore land?

Can they just walk away and abandon the site.

Is there hazardous material in the panels?

There is nothing pleasing in seeing a field of solar panel, as are on route 67 next to FMC College, Johnstown. Our area should not become an area of growing solar panel fields to help NY state full fill its quota for sustainable energy.
